COURSE

otm ≥

**Dr. Domingo Martin - Director of the course (Spain)**

Graduate, University of Bilbao, Medical & Dental School
Postgraduate in Orthodontics, University of Valencia
Graduate, "Roth Williams Center, of Functional Occlusion 2 year course"
Director, Roth-Williams Spain
Juan Carol Prize for Best Presentation in Spanish Society of Orthodontics 1991
Visiting Professor, International University of Catalunya
Active member, "The Angle Society of Europe"
Co-director of Roth Williams International Society of Orthodontists
Private practice for orthodontics San Sebastian, Spain

**Dr. Renato Cocconi - Director of the course (Italy)**

Graduate, University of Milan, Medical & Dental School
Postgraduate in Orthodontics, University of Milan
Graduate, "The Andrews Foundation for Orthodontic Education & Research", San Diego USA
Graduate, Roth Williams Center, of Functional Occlusion
Director, Roth-Williams Italy.
Assistant professor, Orthodontic School, University of Milan
Active member, "The Angle Society of Europe"
Private practice for orthodontics Parma, Italy

**Dr. Alberto Canábez (Orthodontist, Spain)**

Dental Degree. University of Uruguay
Director of the U.D.C.A. Odontology Unit
Postgraduate Bioesthetic Dentistry. OBI
Orthodontics and Orthognathic Surgery Postgraduate. Dr. Quevedo Rojas, Osteoplac
Diploma. Roth/Williams Center for Functional Occlusion
Private practice limited to orthodontics in Barcelona (Spain)

**Dr. Guillermo Ochoa (Orthodontist, Argentina)**

Dental Degree. National University of Cordoba (Argentina)
Orthodontist. National University of Buenos Aires (Argentina)
Diploma in Craniomandibular, Craniovertebral and Facial Pain Dysfunctions.
National University Andrés Bello (Chile)
Diploma. Roth/Williams Center for Functional Occlusion
Director of the A.T.R.A. Research and Development Laboratory Center for TMJ Research

Dr. Mirco Raffaini (Maxillofacial Surgeon, Italy)

M.D. and D.D.S. Specialty Training. University of Parma (Italy)
MD. Advanced clerkships in General Surgery. University-Hospital of Parma (Italy)
Ph.D. Residency in MaxilloFacial Surgery. University of Parma (Italy)
Master Maxillo-Facial Surgery. University-Hospital DIEU. Nantes (France)
MD. in Master in Plastic Surgery. University of Nancy (France)
MD. Advanced clerkships in Plastic Surgery. University of Milan (Italy)
Associate Professor of Maxillo-Facial Surgery. University of Florence (Italy)
Author of numerous scientific publications and books
Private practice. Director and Founder FACE SURGERY CENTER. Parma

Dr. Maria Jesus (Spain)

1993- D.D.S in U.P.V., Leioa (Vizcaya)
1994- M.S in occlusion with Dr. Ferrer (Valencia)
1997- M.S in endodontics with Dr. Hipólito Fabra Campos. (Valencia)
1998- M.S in periodontics with Dr. García Fernández. (Madrid)
2001- M.S in occlusion and oral gnathological rehabilitation with Dr. Quiroga.
2002- Upgrade in conservative odontology in Complutense de Madrid University. (Santander)
2005- M.S in rehabilitation and practical modules with Dr. Gamborena. (San Sebastian)
2005- Training in implantology with Nobel Biocare.
2006- M.S in orofacial disfunction with Dr. Magdaleno, Dr. Torres y Dr. Romero. (Alicante)
2009-2010- Level I / Level II / Level III in Bioesthetics (OBI foundation) with Dr. Alejandro James (Prosthodontist in Mexico), Dr. Ken Hunt (Prosthodontist in USA) and TD John Haupt. (dental technician in USA) (part time in Osteoplac San Sebastian)
2010- Course in All on Four with Dr. Malo. Lisboa (Portugal)
2012- Training in dental and waxing morphology with Thinina Gómez.
2004 / 2007 / 2009 /2011- Courses in total prosthesis with Gerber Method. Max Bossart
2014- Course in intensive waxing with Dr. Ivan Ronald.
2014- M.S modular ATM Dr. Rocabado and Dr. Ochoa.
2014- Course in dental microscopy with Nazariy Mykhaylyuk.

Dr. Korkmaz Sayinsu (Orthodontist, Turkey)

Graduate, University of Marmara, Faculty of Dentistry
PhD in Orthodontics, University of Marmara, Faculty of Dentistry
Associate Professor of Orthodontics, University of Yeditepe (2000-2009)
Graduate, The Roth/ Williams International Center for Functional Occlusion 2 years course
Professor of Orthodontics, Head of Orthodontic Department, University of Istanbul Kemerburgaz

Dr. Toros Alcan (Orthodontist, Turkey)

Graduate, University of Marmara, Faculty of Dentistry
PhD in Orthodontics, University of Marmara, Faculty of Dentistry
Full time Assist&Assoc. Prof. of Orthodontics and Director of Cleft Clinic University of Marmara, Faculty of Dentistry (1998-2010)
Graduate, The Roth/ Williams International Center for Functional Occlusion 2 years course
Visiting and consulting Professor at The Department of Plastic, Reconstructive, and Esthetic Surgery of the Istanbul University, Cerrahpasa MF and Department of Orthodontics of Yerevan State Medical University, Faculty of Stomatology,
Founding member of Turkish Association for Cleft Lip & Palate
Private practice for Orthodontics Istanbul, Turkey

The Roth Williams International Center for Functional Occlusion will be organizing a new 2 year course in Istanbul starting 2016.

This is a theoretical-practical course and it is directed to doctors who have had previous post graduate orthodontic training in an officially recognized institution.

The course will be given by Dr Domingo Martín, Dr Renato Cocconi and in each session we will have the collaboration specialists in every area.

(experts in imaging, TMJ specialists, surgeons and dental technicians)

The objective of the course is to learn the fundamentals of the Roth Williams philosophy and then to be able to apply these teachings in our day to day practice and to help us obtain our treatments goals which are the following:

- 1- Dental and Facial Esthetics
- 2- Functional Occlusion and TMJ Health
- 3- Periodontal Health
- 4- Stability
- 5- Airway
- 6- Satisfy patients chief complaint

The course is theoretical and practical. To be able to obtain our goals we will teach the use of specific instrumentation (articulators, splints, CPI etc) which will not only help us achieve our objectives but it will permit us to check our results. There will be clinical demonstrations and then the students will be involved in the use of all instrumentation.

The course consists of 8 sessions, each session lasts 3 days (8 hours per day) and the sessions are given approximately every 3 - 4 months. The course lasts 2 years. Between each session the students are asked to do some extra work which will then be shared with all the participants in each session.

Past and current courses held in:

Argentina, Chile, Italy, Japan, South Korea, Spain, Uruguay, U.S.A, Turkey, Romania, Poland, Russia

SESSION OVERVIEW

I	Introduction to the FACE Treatment Philosophy <i>4 Days, İstanbul</i>	December 12 -15, 2016
II	Introduction to TMJ <i>4 Days, İstanbul</i>	February 27, March 2, 2017
III	Introduction to Splints: Indications and Uses Diagnosis and treatment planning of unstable cases in patients with TMD <i>4 Days, İstanbul</i>	June 1 - 4, 2017
IV	Treatment Mechanics <i>3 Days, İstanbul</i>	August 25 - 27, 2017
V	Interdisciplinary Treatment: the importance of teamwork <i>4 Days, İstanbul</i>	December 7 - 10, 2017
VI	Bioesthetics and Orthodontics <i>3 Days, San Sebastian or İstanbul</i>	February 15-17, 2018
VII	Orthognathic Surgery <i>3 Days, Parma</i>	April 27 - 29, 2018
VIII	Mixed Dentition <i>4 Days, İstanbul</i>	June 21-24, 2018

SESSION PROGRAM

MARTIN/COCCONI

Continuing Education In Orthodontics

SESSION I

Introduction to the FACE Philosophy

December 12 -15, 2016 İstanbul

Introduction to the FACE Philosophy
Taking Good Impressions... Theory and Practice
Occlusal Concepts
Wax Records (CR and CO)... Theory and Practice
Why Articulators
Face Bow... Theory and Practice
Mounting Procedures en CR... Theory and Practice
MPI/CPI... Theory and Practice
Occlusal Analysis and MPI/CPI
Jarabak Analysis / FACE Analysis
Introduction to the Dolphin Software Program
Photography
Andrews Six Keys
Bracket Placement

SESSION II

Introduction to TMJ

February 27, March 2, 2017 İstanbul

Anatomy, Histology and Physiology of the TMJ
TMJ Imaging Diagnosis and Interpretation. CBCT, MRI
Joint Sounds - Diagnosis and Interpretation
Map of Pain Theory... Theory and Practice
Craniofacial Pain - Diagnosis and Interpretation
Degenerative Joint Disease - Interpretation and Diagnosis
Degenerative Joint Disease - Its implication in Growth and its Effect on Occlusion
Jarabak Analysis and CPI as Related to TMD
Concept of Vertical Control and its Importance in TMD
Introduction to Splints... Classification and Role in TMD
Case Presentations by the Students

SESSION III

Introduction to Splints: Indications and Uses

Diagnosis and treatment planning of unstable cases in patients with TMD

June 1 - 4, 2017 İstanbul

Introduction to Splint Wear - Who, When and Why
Splint Construction Classical Splint and 3 piece Splint
Splint Adjustment and its relationship to TMD Diagnosis
Splint Adjustment... Theory and Practice
Stable Condylar Position - When, Why
Introduction to Hinge Axis Mounting - Theory and Demonstration
Hinge Axis Mounting and Kennedy Cuts... Analogical (Erikson Bite Block) and Digital
Distraction Splint - When, Where, Why and How
Introduction to Shims
Distractions, Elongations, Exercises and Muscle Stretching in the TMJ Patient...
Theory and Practice
VTO and Dolphin
Case Presentations by the Students

SESSION IV

Treatment Mechanics

August 25-27, 2017 İstanbul

Treatment Mechanics in the permanent dentition
SWA - Advantages and Uses
Closing Mechanics with DKL 19x25... 21x25
Treatment Protocols
Anchorage: concepts and management
The use of Transpalatal Bars: concept, theory and practice
Concept of Vertical Control
Treatment Sequence and Wire Sequence
Use of Skeletal Anchorage: Mini Implants and Mini Plates
The Utility Archwire Uses and Indications
Case Presentations by the Students

SESSION V

Interdisciplinary Treatment: the importance of teamwork

December 7 - 10, 2017 İstanbul

Introduction to Interdisciplinary Treatment: the importance of teamwork
Adult Orthodontics
Occlusal Trauma: concepts and importance in diagnosis and treatment planning
Orthodontics and Periodontics
The Importance of the Periodontal Report
Periodontal Orthodontics
Orthodontics and Prosthodontics
The Importance of the Diagnostic Set-Up... Analogical and Digital
Implants and Orthodontics: Implant Site Development
The Use of Implants as Anchorage
Orthodontics and Esthetic Dentistry
Corticotomies: concepts and Indications
The Complete Interdisciplinary Case... Orthodontics, Periodontics,
Prosthodontics and Orthognathic Surgery

SESSION VI

Bioesthetics and Orthodontics

February 15-17, 2018 San Sebastian or İstanbul

Introduction to Bioesthetics

The Biological Model

The MAGO: concepts

Introduction to Negative Coronaplasty

Introduction to Positive Coronaplasty

The Role of the Technician in Bioesthetics

The Importance of Waxing

The Importance of the Orthodontist in Bioesthetics: Clinical Implications

Presentation of Bioesthetic Cases

Clinical Practice:

- Clinical demonstration of negative and positive coronaplasty
- Clinical practice by the students of negative and positive coronaplasty
- Clinical demonstration of wax up
- Students will present cases for diagnosis

SESSION VII

Orthognathic Surgery

April 27 - 29, 2018 Parma

Introduction to Orthognathic Surgery

VTO/STO Pre Orthodontics - Pre Surgical

Pre - Surgical Orthodontics

Surgical STO Theory and Practice

Arnett 7 Step Surgical Procedures

Surgical Techniques

Nasolabial Unit and its Importance in Surgical Planning

Post Surgical Orthodontics

Management of Post Surgical Patient

Model Surgery - Theory and Demonstration

Extractions in Orthognathic Surgery

Presentation of Surgical Cases

Students will present cases for diagnosis

SESSION VIII

Mixed Dentition

June 21-24, 2018 İstanbul

Mixed Dentition: Concepts and Management
Management of the Transverse Dimension: Palatal Expansion with Skeletal Anchorage
Treatment Protocols in Mixed Dentition
Importance of 1st phase of Treatment
Treatment Mechanics in 1st Phase Treatment
Extractions in Mixed Dentition: concept of serial extractions and enucleations
Early Treatment of Class II Vertical Patients
Class III: Treatment Possibilities: when and what to do
Concept of Decoronation
Importance of Airway in Mixed Dentition
Treatment Possibilities and Limitations in Mixed Dentition
Presentation of Numerous Mixed Dentition Cases
Students will present cases for diagnosis

and the graduation dinner...
ve mezuniyet yemeği...
